

SECTION II: FIREGROUND OPERATIONS AND FIRE RELATED DUTIES

2.9 MISCELLANEOUS FIREGROUND REGULATIONS

- 2.9.1 Use of Breathing Apparatus: Self-Contained Breathing Apparatus should be worn by all fire attack and rescue teams on all incidents except brush fires, vehicle extrication when the firefighters are not involved in suppression tasks, and any other incident deemed appropriate by the Incident Commander.
- 2.9.2 Roof Ventilation: A roof ladder shall be utilized when ventilating a roof unless directed otherwise by the fireground commander. After roof ventilation has been completed, all crew members shall get off of the roof and report for further orders.
- 2.9.3 PASS Devices: A PASS device shall be attached to the harness of each SCBA. The PASS device shall be attached to the harness and operational while SCBA is in use.
